

## Press release

**Date:** 21/09/2026

**Wera Werkzeuge GmbH:**

### **Wera Advent Calendar 2026**

### **24 surprises for tool enthusiasts**

#### **Wuppertal.**

With its 2026 Advent calendar, Wera is once again bringing surprises for tool enthusiasts this year. A particular highlight is the compact, battery-powered Kraftform screwdriver torch 'Flash-driver' with an integrated ¼" bit holder. The LED delivers 80 lumens and can be operated at two brightness levels. The automatically focusing light cone ensures optimum illumination. With a bit inserted, the torch can also be used as a screwdriver.

Behind the 24 doors, you'll also find nine 50 mm-long BiTorsion bits, a Kraftform handle with ¼" uptake and seven L-keys (metric sizes). The bits cover the standard screw profiles: slotted, Phillips, Pozidriv, TORX® and hex. The BiTorsion zone cushions peak loads and ensures a longer service life of the bits.

When it comes to storage Wera relies on a well-thought-out organisation system: screwdriver torch, bits, Kraftform handle and L-keys are stored in four separate modular holders. These can be

attached to a sturdy, textile tool organiser and or to the Wera Modular System using the included adapter.

The set is rounded off with a bottle opener featuring a ¼" hexagonal drive – perfect for unwinding after a hard day's work.
