

Press release

Date: 17/09/2026

Wera Werkzeuge GmbH:

The Tool Rebel roller cabinets – now also available without tools. The configuration is up to you.

Wuppertal.

All three Tool Rebel roller cabinet models are now available without tools. Models 9800, 9805 and the XXL Stainless version 9801 (models 9805 and 9801 feature a high-quality stainless steel worktop) are supplied empty, allowing you to create your own personalised setup. You decide for yourself which tools to include.

Tool Rebel roller cabinets are known for their uncompromising robustness, high load-bearing capacity and a look that immediately catches the eye in any workshop. The double-walled, fully welded construction easily withstands even the toughest conditions and provides the foundation for genuine professional performance.

Thanks to a 100% drawer pull-out with ball bearing telescopic slides and a self-closing mechanism, quick access is guaranteed at all times. The integrated drawer stop ensures that only one

drawer can be opened at the same time, prevents simultaneous pull-out of multiple drawers, and reduces thereby the risk of tilting. Each drawer features an elaborately laminated print giving the roller cabinet its unmistakable Tool Rebel look.

With a dynamic load capacity of up to 750 kg, large, smooth-running wheels and square head boring on both sides for customised fittings and modifications, these roller cabinets are ready for whatever is thrown at them.
